Todd: Voith is looking at available sites hoping to find an existing structure to lease. Would the authority still be able to help with financing to make building modifications if necessary so they can begin producing turbines. They hope to be up and running by end of March. Would you be able to help them with these associated costs in this short timeframe? I'm assuming that with stimulus money you would want to get these dollars out there in the economy quickly..

Happiest of Holidays to you....
Christi

Christi,

They can go to the green blob on our website and that will take them the webpage. There they will need to fill out an applicant profile which will take them to the "Letter of Intent" (LOI). If you have any questions give me a shout. The authority should also be able to assist in the financing of the facility under the new definition that covers the manufacturing of a pollution control facility, i.e. hydro-electric turbines.

Have you heard anything from Donnie regard Evonik/Degussa and AMP.

Thanks,

Todd
