

Please set a good example for our kids. Get on the good side. - Patrick Wardlaw, Franklin County

Working in higher education in the state of Ohio, I want to make sure that we educate our students to the best of our ability, while at the same time ensuring that they have a better environmental future to look forward to. I urge you to continue your work advancing education here in the state of Ohio, and at the same time becoming a champion of environmental causes. Your position on the board of Massey Energy does not seem to advance the former and is definitely at odds with the latter. Please resign immediately.

- Dr. Tim Boester Assistant Professor of Mathematics Education, Wright State University

You should be ashamed of yourself. - Elzie Marcum, Franklin County

It's time to put your money where your mouth is and resign from the Board of Massey Energy. - Jean Nadeau, Cuyahoga County

It is not your right to mess up the environment for the future generations to clean up. - John Fredrickson, Jefferson County

Let's finally get rid of these Conflicts of Interest, President Gee. It's a national problem, and you can be a leader of the much-needed reform! - Eric And Kate Helt, Knox County

I'm an OSU alum and am ashamed of this clear conflict of interest. If you want to make the excuse that you're serving on Massey's board to improve their environmental practices, then stop taking money for your service. Surely you make enough from your OSU salary and all the other pots you probably have your fingers in. - Matthew Teaman, Franklin County

i grew up in columbus ohio and i know how important OSU is to everyone, you have to set the right example and let us be proud of ohio! - Maggie Roberts, Cook County

Get your head out of your ass and your hands out of Massey's pockets. - Tom MCGurk, Warren County

As a graduate of Ohio State University, I'm particularly concerned if these allegations are true. If so, it's time to sever one relationship or the other, personally I'd prefer to see you leave the board of Massey. Best wishes in your decision..... - Richard Manoukian, Hamilton County

Better yet, just tell him to resign from Ohio State. - Neva Days, Franklin County

Supporting alternative energy is good. Being a board member of a coal mining company with a terrible safety and environmental record is bad. Please admit you favor dirty coal companies with poor track records or resign. - Fred Schindler, Montgomery County

As an alumni of OSU, I would like to see you resign from the board of Massey Energy and show the people of OH and all those associated with OSU that you do not believe in Massey's environmental policies. Do not take their dirty money, they have a shameful record that I would hope you do not want to be associated with now that you are co-chairing the committee to end our nation's reliance on foreign oil and develop renewable energy. Thank you for your consideration. - Carol Hunt, Cuyahoga County

Please lend your voice to renewable energy, not dirty coal with such a vile history. - Jean Lally, Knox County

You must resign from this two-faced position @ \$200,000 at Massey Energy. Their record is foul, how can you be a spokesman for them? - Lola Gertz, Butler County

Our actions speak louder than words. - Andrew Murry, Fairfield County

Conflict of interest here, Gordon Gee. - B. Deahl, Athens County

Dear Mr. Gee, Shame on you for your greed and your blatant disregard for the welfare of the state that pays your salary. Resign from Massey at once. Or leave your post at OSU. Better yet, do both. We don't need 'public servants' such as you. Sincerely, John Weil, Cuyahoga County

If this information is essentially accurate, this is no place for a University President. - Elaine Stevens, Cuyahoga County

Let's practice what we preach. Please resign from Massey's board of directors - April Johnson, Franklin County

I'm an Ohio taxpayer and Full Professor of Management in the School of Business at the University of Dayton. As a citizen and Ohio taxpayer who pays your salary, I'm stunned that you're on the board of a company that is systematically engaged in mountain top removal to extract coal. I'm additionally appalled that you're receiving \$200k per year to serve on this board. Your salary as President of Ohio State University should be more than enough to meet your needs and to provide for a comfortable retirement. Go back to basic principles (academic and human), resign from this board, and represent the people, not a narrow economic interest that is doing permanent harm to the public interest.

Wesley King, J.D., Ph.D.
Professor, Management
School of Business Administration
University of Dayton

Being on this board is not worth ruining your reputation - Steven Sevell, Franklin County

go - Ardis Ligon, Hamilton County

It's time for you to resign from the board of Massey Energy. - Rebecca Bevill, Auglaize County

Don't destroy the mountains for coal. There is no such thing as clean coal. We need to develop completely new energy technologies by thinking outside the box. - Roger Bookland, Warren County

It's time for you to resign. - Walter Ohlmann, Montgomery County

Dear Mr.Gee,

It is time to put integrity before greed. There is an obvious conflict of interest between your paid position on the Board of Massey Energy and your paid position as head of a university dedicated to the research of renewal energy and environmental protection. You are first and foremost an agent of Ohio State University. It is their interests you should be representing. As an Ohio tax payer, I demand no less. - Barbara Mcconaghy, Franklin County

If you are truly a national leader in renewable energy, you will either resign from the Massey board, or forgo the \$200,000 to eliminate that conflict of interest. - Marie Graham, Athens County

Resign From Massey Energy's Board Of Directors

There is no way to reconcile serving as co-chairman of a newly formed partnership of public research universities pushing to reduce the nation's reliance on foreign oil and develop renewable energy, and being paid nearly \$200,000 a year for serving on the board of Massey Energy, a coal company with one of the nation's worst environmental records.

Do the right thing and be a role-model for your students and others--resign immediately. - Lyndee Wolf, Summit County

At this time there is no "clean coal". - Edgar Singleton, Lucas County

President Gee,

I think it would be more effective and honest of you to resign from the partnership of public research universities pushing to reduce the nation's reliance on foreign oil and develop renewable energy. Having already served and still serving as a board member of Massey Energy I don't think you would be working whole heartedly towards the goals of developing renewable energy. This seems to be in conflict with your already established goals.

Dave Allen
GreenBird LLC
Cincinnati, OH

President Gee- as an OSU student, I'm very pleased with what you and the school are doing to lessen the institution's impact on the environment. Please don't tarnish the reputation you have created as a champion for the environment. I urge you to step down from your position as a board member for Massey Energy.

Thank you,

Morgen Kuberek, Franklin County

Based on Massey's track record on environmental issues, I feel that you should step down from the board of this conglomerate. I guess you don't make enough money from running OSU? - Charles Parker, Franklin County

Greedy... - Aaron Kelly, Montgomery County

Personally, I think you should resign the co-chairmanship. I don't think Massey would be paying you \$200,000 if they thought your heart was in leaving behind non-renewable and environmentally unfriendly energy. - Joseph Seeholzer, Cuyahoga County

Equally, you could stick with Massey and resign from OSU. - William Sharfman, New York County

Dr. Gee, You need to remove yourself from the board of Massey Energy. - Elizabeth M Stone, Franklin County

You should know by now that damage to our environment is a very serious issue, deserving of action, not just lip service. As the President of OSU, you are a leader to the next generation of leaders. Set the right example and get your priorities straight. You don't need an extra \$200K a year. We need to break our reliance on fossil fuels. - Andrea Studebaker, Franklin County

I am a Columbus lawyer and environmental advocate. I received three degrees from Ohio State: a BA in 1981, a JD in 1987 and an MA in 2004.

You cannot sit on the board of Massey Energy and call yourself a renewable energy advocate without reeking of hypocrisy and sully Ohio State's reputation. In the largest sense, coal burning power plants are one of the largest single sources of global warming pollutants in the world. And mountaintop removal mining is an abomination -- your company is stealing the Appalachian landscape from future generations, and often that fill gets dumped into streams in a way that clearly violates the intent of the Clean Water Act.

More specifically, Massey has a long and controversy-strewn history that I'm sure you're well aware of.

I welcome your spoken commitment to renewable energy, Doctor Gee. My comments are my own, but I am a nominated candidate for election to the Sierra Club Board of Directors. We need your help to stop an environmental catastrophe. But you seem to believe that you can portray yourself as a public environmental advocate and be on Massey's payroll at the same time. You can't. As an environmentalist and as someone who cares about Ohio State, I urge you to recognize your error and resign from Massey's board. - David Scott

Dr. Gee, your credibility suffers and you cannot be an example to the thousands of OSU students by taking one public stand on energy and the environment while privately benefiting from the horrific environmental policies espoused by Massey. Please decide which side of this issue you are on. - J N Kreutzer, Franklin County

You are so about big money and putting on shows--this should be a good one for you to "show" people you have their best interests at heart! - Peggy Robinson

Please put your incredible energies to work for the good of all and guide Massey Energy see the benefits of being responsible as a steward of the environment that will not ruin their bottom line. If they aren't concerned, then you must use your good name to expose their environmental disregard.

Thank You,

Jim Hunt

Dr. Gee-I'm disappointed that the president of OSU would serve on the board of a for-profit corporation, much more so that the corporation in question is one with a poor environmental record. Mountaintop removal is a hideous practice. I hope you will resign from Massey Energy's board. - John Holcomb, Butler County

I only hope that this is not true. If so, make a decision. Don't be a hypocrite. I am an alumni.
Dr. Richard L. Starn - Richard Starn, Cuyahoga County

As an Ohio University grad, I've never much cared for Ohio State in as much as they tend to suck all the air out of the room whenever Ohio an college are mentioned in the am sentance. That having been said, Dr. Gee, don't let these bat shit crazy neo-Marxist "green" goons intimidate your professional and persona choices! Serve on the boards and committees that you see fit and lead with a good conscience. There are scores of Ohioans who's table of bread and meat comes directly because of coal. So, proudly tell ProgressOhio to take the shaft and know that many non-OSU Ohioans are totally in your corner. - Fred Steiner, Cuyahoga County

Being a graduate of and part of a family of many graduates of The Ohio State University, I am profoundly sorry to hear that you chose to be in a position where your creditability is called in question. This is bad for the University and bad for America. - John Chrystal, Beaufort County

You disappoint me. You actions taint my degree from THE Ohio State University. - Eric Dunn, Franklin County

Dear Mr. Gee,

I believe you were chosen to return to OSU for a reason. I also understand there are several sides to every story, however, I would seriously consider how your connection with Massey "appears."

To me, \$200,000/year is more than I will probably ever make, however, you could resign from that board position and still have a very comfortable existence. Please don't lose sight of the planet from that ivory tower - you live on it too.

Thanks. Tabitha Palmer, Franklin County

As a graduate of OSU, I strongly oppose your double standards re: energy. In my opinion, it is time to put your money where your mouth is and RESIGN FROM THE BOARD OF MASSEY ENERGY (that has the worst environmental disasters in the region's history.

Thanks for your consideration. Blessings, Linda G. Butler, MSW - Linda Butler, Clark County

Its time for you to resign from the Board of Massey Energy. Your duty is to OSU and to the future.

John Seibert

Class of '74 BSBA - John Seibert, Franklin County

Mr. Gee, do the right thing. - Carol Patton, Hamilton County

I respectfully ask you to discontinue your conflict of interest. In a time when true ethical leadership is needed, you should be ashamed of yourself. - Sandy Caldwell, Medina County

AS a former student in the OSU MBA program, I ask that you resign from the board of Massey Energy. I think you were a good president of OSU the last time around, but this time it seems that money is at the heart of your interests. Surely the state is providing enough (too much?) to you. You don't need another \$200K from a questionable coal company. - Rita Smith, Delaware County

Shameful Mr. Gordon..... If America Is The Golden Goose- You Sure Are Doing Your Part To Strangle Her.

Funny Isen'T It How Disaster Makers Never See Their Dark Side....How They See The Opportunity To Make \$\$ For Them At A Cost Of Harming Citizens...Who I Might Add Are Then Asked To Give Their Children In Wars To Keep The "Home Land" Safe For Money Greeders.....Seems They Never Stop Seeing Themselves In The Mirror....Your Behavior Shows...If You Love This Land Or Not...Shameful. - Carol Bratta, Wayne County

As an Ohio State Student, I would hope that you would avoid such conflicts of interest as being on the board of a coal-based energy company while claiming to be interested in cleaner energy. Which is it? - Sean Hickey, Franklin County

Get Out, just another corrupt crook - Howard Arnold, Los Angeles County

Mountaintop Removal Mining is an egregious practice. Resign Massey Today! - Dave Harding, Franklin County

If you are truly in favor of Green energy and green jobs, you need to resign immediately from Massey Energy and prove to the people of Ohio that your money is where your mouth is. Stop taking the oil money and speaking from both sides of your mouth! - Deborah Hajzak, Cuyahoga County

Mr. Gee: If I am to believe these allegations I would be very disappointed in your poor decision and hypocrisy. Your income and lifestyle is likely in the top 1% of all humans on the planet and therefore carry a greater burden of responsibility to humanity. So I ask you, are you being a responsible steward of this planet by being a part of Massey Energy? If so, please explain.
Regards, Steve Lopez, Franklin County

The millions you make at OSU aren't enough? - Ken Carolus, Montgomery County

Hypocrite! - Don Lair, Franklin County

HAVE THE GOOD GRACES TO RESIGN FROM MASSEY. - Larry L. Miller, Summit County

Your association with Massey Energy creates a conflict of interest which contradicts and makes a mockery of your stated commitment to improving the environment. Dirty, unsustainable energy is the way of the past, and is holding Ohio back, and is not in the interest of the citizens of this state. Our universities need to lead the way to a better future, economically, environmentally, and technologically. You must do better at representing your institution and your state. - Rebecca Wood, Lucas County

How can you stand for renewable energy and green jobs when you are on the Board of Massey Energy? Please resign. - Dorothy & Richard Chamberlin, El Paso County

I have a real problem supporting a public employee in a position where he or she is being paid by a private enterprise. - Elmo Layman, Champaign County

My tax money is going towards your huge salary and that's not enough for you? I used to have respect for people like you, but the more I find out about covert activities of those of your ilk, my respect has dwindled to zero! - Mary Tabatcher

Mr. Gee,

I don't see how you can effectively serve both interests.

Choose one side or the other. Resign as co-chairman or resign from the board. - Joan Lannoch, Cuyahoga County

Being a leader in renewable energy and green jobs should exclude representing a company with the history of Massey Energy. Where is your integrity? - Dianne Flynn, Franklin County

You, sir, are an embarrassment to the State of Ohio and OSU, by maintaining your position on the board of this egregious polluter. Time to resign from the board or from your OSU position. You can't have it both ways! - Tom Adams, Cuyahoga County

As children, my sister and I got lumps of coal in our stockings at Christmas for being bad.

Now is the time for you to let in the sunshine and put out the coal. - Patricia Marida, Franklin County

Resign from Massey Energy, now, sir! - Doug Harbour

I am truly disappointed to hear of your involvement with Massey. Set an example for responsible leadership and resign. - Barbara Rousey, Franklin County

Mr. Gee...For a man of two faces there are two doors. Which door will you choose...Right or Wrong? I hope you choose the Right door and Resign From Massey Energy's Board Of Directors! - Lois Tonoff, Wood County

It's time to put your money where your mouth is and resign from the Board fo Massey Energy. You should be ashamed of yourself and your greed. Have you no conscience? Clearly not unless you resign. - Susan Pettit, Franklin County

You must be crazy to be even slightly involved with Massey Energy. This is a perfect example of why the American public views politicians and business people, in general, as criminals. We can't trust anyone in a position of "power". Get away from Massey Energy. I know I will be backing away from any continued support of Ohio State sporting events until you do. Very, very frustrating. Unbelievable.

- Kathleen Miller, Wood County

Stop your mixed messages. Resign from the coal company and donate your \$200K fee to a non-profit working on new, clean renewable energy.

- Sammie Rhoades, Hancock County

Please resign from the Board of Massey Energy. Their record is horrible and your position warrants looking at the whole picture and what your presence on the board implies. - Marybeth Rose, Stark County

Dear Mr. Gee,

It is time to resign from the board of Massey Energy. This company has one of the worst environmental records and partakes in the devastating process of mountaintop removal coal mining. Massey Energy has used their considerable funds to back judges that will be friendly to them and their practices, thus distorting democracy in West Virginia.

What sort of example are you setting to the students of your university (of which I am an alumni) when you speak about the need to invest in green technology but you serve on the board of such a company? Is the lesson "Do as I say, not as I do" or perhaps it is "Money conquers all"?

I respectfully ask you to resign from Massey Energy.

Sincerely,

Kellie Brown, Franklin County

I think your job as president of OSU should keep you busy enough these days. You can't possibly be working for the best of Ohio's students while on the board of any corporation. - Lisa Disque-Holmes, Montgomery County

President Gee,

We need you to walk the talk!

OSU, Class of '97 - Ellen Armstrong, Franklin County

How can you accept a salary from this irresponsible company? Your resignation would speak volumes! We need sound leadership and leaders who "walk their talk"! - Francine Crist, Stark County

Mr. Gee, you cannot play both sides of this issue. I would think you would have resigned from Massey Energy without the people of Ohio telling you. You can not have your cake and eat it so to speak. I realize the profit you make from this polluting giant is hard to turn down. If thats the case , then resign your place on the renewable energy program. You cannot do both. - Karryn Hart

As an OSU Alumni and environmentalist I find this information - you serving on the Board of Massey Eney - most disturbing. - Jay Lee, Montgomery County

I look forward to hearing from you when your resignation is submitted and also to reading about it in the papers.

- Warren Harrington, Stark County

Do the right thing! The future lies with renewable energy, the types of projects that are currently going on at Ohio State. It would seem to me that the move to renewables is at odds with your sitting on the board of Massey Energy and I would suggest that you reconsider your position on the board. - Ron Pilatowski

Time to resign and and or make a \$200,000 donation to an organization that is dedicated to renewable energy like repoweramerica.org. - Johnine Byrne, Cuyahoga County

I had no idea you were involved with such a disreputable company as Massey. Your presidency at OSU is a full-time job. It's inappropriate for you to support and direct this dreadful outfit. - Michael Barr, Athens County

Resign from Massey, no double standards, protect us from the result of our reliance on coal. - Don Unrau, Multnomah County

As a member of the Massey Coal Co. board, what actions have you taken to clean up their act? - Lois Whealey, Athens County

Best Gordan Gee,

Please practice what you preach and resign from the board of Massey and truthfully devote yourself to clean and energy. Please don't be a hypocrite we have had enough of that from the Bush administration and see where it got us.

Yours, Glenn Bassett, Hamilton County

Shame on you!!! Resign immediately..... - Anita Allen, Clinton County

We, my sister, my father and myself were all OSU grads. I went to Al Gore's speech at OSU and listened to you introduce him. I am outraged and sickened that you dishonor our state and our school with your link to Massey Energy. Please do the right thing and resign immediately and apologize to the people. - Ann Porter, Fairfield County

We, my sister, my father and myself were all OSU grads. I went to Al Gore's speech at OSU and listened to you introduce him. I am outraged and sickened that you dishonor our state and our school with your link to Massey Energy. Please do the right thing and resign immediately and apologize to the people. - Ann Porter, Fairfield County

Mr. Gee,

I'm writing to urge you to resign from the board of Massey Energy. The money you take is as dirty as the coal they burn and as blood soaked as the mines they run. - Mark Fradl, Montgomery County

This is shameful and hypocritical. - Joseph Lite, Montgomery County

"Green energy" and coal don't go together. And Massey Energy has one of the worst environmental (and human safety) records of all. - Megan Mcdermott, Montgomery County

It is distressing to learn that such a distinguished and respected leader of my home city's university is a paid board member of Massey Energy. Massey has a deplorable environmental record. Please sever your ties with this company which exhibits policies and procedures that damage our environment. - Donna Coolidge, Franklin County

Mr. Gee -

You can't speak for the environment and the coal industry at the same time - it's hypocritical and unethical!
- Laura Spence, Cuyahoga County

You should be ashamed. - Douglas Neumann, Summit County

I guess even you can be bought? - Randolph Griffin, Wood County

Shameful. - Perry Chappano, Franklin County

resign from the board of Massey Energy...love ur mother earth - Al Geiner, Franklin County

You need to choose which side of the fence you are on. A hypocrite is not what the administrator of a university should be. Especially when the one side of the fence is destroying the environment and creating a very unhealthy situation for the citizens where Massey does its destruction to the landscape. Please resign from the Massey board of directors. Thank you. - Donald Burg, Los Angeles County

Please think of our future energy development and our citizen's health and resign from the Board of Massey. Explain to students at OSU how you can claim to be working for clean, green energy but be a paid supporter of the coal industry. I'm disappointed in you as such a visible educator. - Tristine Roberts, Cuyahoga County

How can you possibly justify this. There really is no justification. It's disappointing, and shocking. - Susan Warner, Franklin County

Do the right thing. Mr. Gee. I'm sure you don't need the money, so set a good example for your students at OSU and resign from the board of the disgraceful Massey Energy - NOW!

Sincerely,
Al Hidalgo, Hamilton County

Resign. Put the best interests of the environment first. - Carol Bartosch, Cuyahoga County

President Gee,
Please do the right thing, and step down from the Massey Energy Board, now that you are a leader in the new renewable energy and green jobs movement. - Karen Krause, Lucas County

If this is accurate, you are indeed speaking out of both sides of your mouth. That is a political attribute but not one I associate with the head of OSU. Please reconsider your position on this board. Thank you. - Mary Gibson, Delaware County

Your accepting money from Massey speaks volume about your values. - Don Burrier, Stark County

As a former Director of the Ohio Department of Natural Resources, I am very disappointed that you would maintain a relationship with this company. You certainly do not need the money, considering what the taxpayers of Ohio are paying you. Do the right thing, resign from the Board and dispose of whatever stock you have in Massey Energy. - Joseph Sommer, Stark County

Mr. Gee, It is time for you to be a role model and stop trying to be all things to all moneymakers. Make a decision that will be a part of your legacy--show yourself to be a leader for the 21st century--someone students can admire--don't sell out--the money should not matter more than the future. Can you do the right thing? Yes you can. - Marjorie Prince, Franklin County

President Gee,
I love you, but please don't serve on this board. Do the right thing.
Go Bucks - Will McGlynn, Franklin County

Please do the right thing,. Resign from Massey, and put your talent to use promoting clean, renewable energy that promotes jobs and saves people's homes from destruction. - Susan Lynch, Franklin County

Sometimes it is hard to do the "right thing", especially when it's going to cost you, but you should resign from the board of Massey Coal. As a former resident of WV you're making the rest of us "out migrants" look bad. - Ben Barnes, Mahoning County

Be consistent. Either drop links to Massey Coal or resign from the Energy Initiative Advisory Committee. You cannot with integrity serve both. - Richard Barnes, Hamilton County

It's time to try something new! Integrity! Ethics! Telling the truth and not manipulating and deceiving the public to help Massey continue their destructive behavior! We the people are sick to death of liars running the show and the tide is turning. - Valerie Josi, King County

Please consider the ethics of being a boardmember of a major, unrepentant polluter. - Max Frazier, Franklin County

Massey Energy has been one of the worst offenders in mountaintop removal, and an opponent of renewable, sustainable energy. If you truly want to help our country move toward a more sane energy policy, please remove yourself from affiliation with Massey. Thank you. - Ann Orr, Seneca County

Time to clean up your act, sir, and bring your actions in line with your intentions. - Benjamin Gorman, Franklin County

I think you need to be straight with the people and tell them you are on the Board of Massey Energy!! (your credibility is at stake, you know). - Danielle Jenkins, Knox County

I have respected your work here in Columbus at OSU. I can understand being on the board of Massey Energy IF you are able to effect changes in their usual method of operations.

If you are not able to effect change, I suggest taking a stand and leaving their board. Some public statement regarding either stay with them or not would seem to be appropriate. - Michael French, Franklin County

I'm shocked that a highly paid (over-paid in my opinion) university president would serve on a board with this kind of environmental record.

I suggest that you resign, post haste. - Roldo Bartimole, Cuyahoga County

Dear Mr. Gee,

I do not know a whole lot about this situation (only what Progress Ohio has sent me) but I am concerned that you are receiving money from a coal company while helping to formulate a plan to reduce our dependancy on foreign energy. I realize that coal is an abundant American resource but I am stongly opposed to the terrible environment impact of using coal as an energy source. It seems to me that if you are receiving money from a coal company, you will not be able to be objective about the role of coal in the transition from foreign to domestic enery production.

Given this, I believe that you should resign from one committee or the other. If you would like to e-mail me directly with your take on this matter, I would be happy to consider it.

Sincerely,

Tom Jeffire, Franklin County

Dr. Gee - Perhaps you have a good reason for serving on the Massey Energt biard, but it seems to me, as an ordinary citizen, you are opening your self up to the appearance of a serious conflict of interest, if not the reality. Please consider your role as a community leader and do not continue to support a company that has been so destructive to our environment and the lives of so many people.

Sincerely,

Alice Abrams - Alice Abrams, Hamilton County

President Gee,

I am very dissappointed to learn of your associations with Massey Energy, a company with a very disturbing track record of environmental degradation. As president of a leading scientific research institution, you should be a part of the transition to an economy based on cleaner fuels. Clean coal is a myth. It's like a healthy cigarette.

Dr. Gee, many of Ohio State leading researchers have been involved in climate change research and worked with the IPCC. It is time for OSU to put that knowledge to action. As a university we should ratify the recommendations of the IPCC and reduce our carbon emissions by 80% over the next 50 years. Indeed it is a part of our mission as a land grant institution to spread the results of research and change our practices accordingly. OSU should be a leader in dealing with climate change. The worlds most noted authority on climate change, Dr James Hansen of NASA, said on this campus last year that the most important thing that we can do to avert massive climate change is to reduce or end our use of coal.

Be a good example Dr Gee. Don't take the coal industry's money. Work for a better future and a stable climate for our grandchildren.

Thanks - Joshua Beniston, Franklin County

You should be ashamed! - Jan Clark, Franklin County

You MUST sever all ties w/Massey!!!!!! What hypocrisy!!!!!! - June Sheatzley, Hamilton County

OSU President Gordon Gee is talking out of both sides of his mouth.

While serving as co-chairman of a newly formed partnership of public research universities pushing to reduce the nation's reliance on foreign oil and develop renewable energy, he is being paid nearly \$200,000 a year for serving on the board of Massey Energy, a coal company with one of the nation's worst environmental records Massey Energy's shameful record:

behind one of the single worst environmental disasters in the region's history, according to the EPA.

biggest Dept. of Justice settlement in the coal industry's history, for safety violations which led to a deadly mine disaster.

largest fine in EPA history for violations of the Clean Water Act. - Perry Phillips, Portage County

President Gee should resign from the board of the energy company. Regardless of whether the company is good for the environment or not it is a conflict of interest for him to be on the board of the company while also being president of OSU. - Patrick Mackin, Lorain County

Get the soot off your resume. Resign immediately. - Jerry Dolcini, Cuyahoga County

Congratulations on your appointment as co-chairman of the newly formed partnership of public research universities pushing to reduce the nation's reliance on foreign oil and develop renewable energy. I understand you are also being paid nearly \$200,000 a year for serving on the board of Massey Energy, a coal company with one of the nation's worst environmental records. Which side are you on? - Kathryn C. White, Athens County

It's time for you to actually do what you say you do. - James Fellrath, Franklin County

I was shocked to learn about Mr. Gee's involvement with Massey Energy. This is an inexcusable conflict of interest when he is supposed to be leading progress at OSU. I am very disappointed and hope he will make the appropriate decision to resign from Massey Energy's board. - Ashley Zielinski, Franklin County

you have a conflict of interest -RESIGN!!!!

FROM MASSEY ENERGY....STOP Being GREEDY - Jim Kerns, Champaign County

Your membership on the Massey Board of Directors is a disgrace to The Ohio State University.

As an alumni member, I believe your involvement with Massey and its continuing poor ecological record does misrepresents the University's goals and ideals.

You should resign from the Massey Board of Directors immediately. - Steve Neago, Clermont County

Someone is getting short changed here, and since I don't have any interest in Massey Energy then as a taxpayer of the State Ohio I would have to question your salary as President of Ohio State University. You second job pays you two hundred thousand, so it must cause you to be away a great deal of the time. If thats not the case then your just exploiting your position and cheapening the great university that employs you....Have you no shame or are you just in this for yourself. - Bob Mack, Geauga County

I feel that Gordon Gee has shown more interest in accumulating personal wealth than he has to any of our many significant social causes. His role as a director with Massey Energu is further evidence of this behavior. His track record leaving OSU in the 90's for Brown, Vanderbilt and back to OSU only substantiates my personal view. - Anita Smith, Delaware County

We remember you, Mr. Gee.

Now clean-up your act and be at least a bit more objective in your work. - W. Little, Denver County

As a former professor at Ohio State University, I am deeply disappointed that you would continue to have ties with Massey Energy yet call yourself a supporter of the environment. We expect better from the president of The Ohio State University. - Kathryn Kram, Franklin County

Yes, Mr,Gee you alluded the students,Facilty and staff and public when you first took office years ago and now your back for more. But now it's coming out. You don't really care about the people, just your pockets. Resign Mr, Gee and be honest to yourself so you can be honest with us (the people) - Bill Ebner, Franklin County

Sad to hear that you are now at the behest of Massey Energy's destructive policies and drawing down a six figure salary, while doing so. Many hope that our public figures and educational gurus will take environmental damage seriously and begin to stand up for the creation. This involves in part your good name and reputation to be sure. As Shakespeare was wont to say, "Good name in man and woman is the immediate jewel of their souls. He who steals my purse steals trash; 'twas something, nothing! 'Tis mine, 'tis his and has been slave to thousands. But he who filches from me my good name steals that which enriches him not and makes me poor indeed." My personal hope is that you and many holding official standing within offices that serve the nations' needs within the public domain will stand up for environmental change that honors the creation. Remember your part and good name within it. After all you and I are privileged to carry out our lives through the wonderfully balanced ecology of this beautiful place. We simply must do all within our power and professional lives to reverse policies that pollute mightily, while profiteering greatly, and at the same time put little thought and effort into reversing such policies. - William Smith, Lucas County

Mr. Gee...

It simply doesn't make sense for you to speak of environmental responsibility while simultaneously getting paid by a company that has no concern for it. Please align your actions and words, otherwise we have no reason to trust what you say.

Thank you. - Holli Kendall, Knox County

Does The Work Hypocrit Come To Mind - James Bright, Marion County

While I find your return to OSU regrettable and your contributions to genuine progress their negligible, the least you can do is try to not be quite so publicly hypocritical.

I don't expect you to make any kind of truly creative or forward looking contribution to the partnership of public research universities efforts to reduce oil dependency, but the least you can do is resign your position on Massey Energy's board and pretend you are about something other than self-enlargement. - Chista Hupp, Knox County

Mr. Gee, you are the face of our beloved Ohio State Buckeyes.

To "talk out of both sides of your mouth" is to put a stain on Ohio State and our Ohio. You should set an example for all

OSU students. Get out of the coal business. - David Forgatsch, Sandusky County

I am a retired faculty member who now lives in Southeastern Ohio, the heart of coal country. I have seen for myself the legacy of environmental damage done by the coal industry. There is no such thing as clean coal. It is unconscionable for you to say that you are promoting clean energy while you are paid to be on the board of a major coal company. I urge you to resign your position on the board of Massey Energy. - Mary Beth Lohse, Meigs County

Dear President Gee,

We were shocked to learn that you are receiving \$200,000 a year for being on the Board of Massey Energy. Are you aware of the bad environmental record of this company? We feel that the honorable thing to do is to resign from this Board.

If your argument is that you are there to try to make changes in the practices of this company, then make this known and agree to serve without compensation.

We are waiting to see what you will do.

Thank you. - Henry & Johanna Diehl, Defiance County

Please do the right thing! - Elaine Mcsweeney, Franklin County

Dr. Gee,

How big was the grant (bribe), other than the outrageous salary, did Massey give OSU for dirty coal research? Please disassociate yourself and the good name of Ohio State from this environmental criminal.

Robert K. Kyle, Franklin County

As an alumni of OSU, OSU's leadership in shifting our economy toward green energy and green jobs is crucial. And you are at the helm.

I urge you to resign from Massey Energy's Board of Directors to demonstrate your full commitment to developing green energy.

Thank you for your consideration. - Marilyn Welker, Champaign County

Nobody likes a hypocrite.... - John Chaffin, Ross County

As alumni of OSU and central Ohio environmental activist I am appalled by your involvement with Massey Energy. I often read about OSU's new Institute for Energy and the Environment (IEE) and have been encouraged by this effort from the University however, you sitting on the board of Massey Energy stands in opposition and in contradiction to the goals you yourself put forth on IEE's website. The ways of doing business is changing, the way politics work in this country is changing; we need leadership who truly represent what they preach. - Deb Steele, Franklin County

This obvious conflict of interest (surely you can see this) needs immediate correction. - Miriam Murray, Hocking County

We need leaders especially of fine Universities like Ohio State who are willing to oppose the Massey Energy company policies instead of raking in huge bucks to enable their environmental disasters. Please, please resign from their board and work for environmental health. You stand to be a model for all the students at Ohio State -- think of the impact of such a courageous action for the entire student body. Our daughter is a proud graduate of your University -- but this wrecks any pride she has had. - Nell Taylor, Cuyahoga County

Please don't be a hypocrite. Practice what you preach... unless you are able to change Massey Energy's environmental record into one that promotes clean, green energy. - Kenneth Koncilja, Lake County

I am disappointed to learn that you receive \$200,000./year from Massey Energy. A company that has little to no regard for the environment and the people who live in the area and work for Massy. I hope you will reconsider your relationship with this destructive, negligent company. Otherwise, the only reason I see for your continued relationship is GREED! - Wendy Stewart, Fairfield County

We are watching you. Please put human safety above the almighty dollar. You claim to be a man of principals. Now please prove it!! End your relationship with Massey NOW!!! - Michelle Salisbury, Franklin County

Do the right thing! - Barbara Gallo, Cuyahoga County

As a proud graduate of O.S.U., I find it impossible to understand why you would ever consider any kind of association with a company like Massey Energy. I didn't think you were the kind person who was for sale. I don't care how much they paid you, your reputation was worth more. - Jo Dreve, Franklin County

You can't have it both ways...you are acting like a Senator on the take! - George Chandler, Garfield County

Dear President Gee, It is inappropriate for you to be sitting on any Board of Massey Energy. For that matter your well paid position as President of The Ohio State University should be your only paying job. If you are really earning your \$200,000 from Massey then you are surely shirking your duties and responsibilities at OSU. Isn't your salary enough? If not then it is time to say enough is enough to you. Patric Mary Bauer O'Brien, BSN'68, MSN, JD

As an OSU alumni, I think it is totally inappropriate for you to be serving as the President of the largest university in Ohio and also serving on the board of Massey Energy. Massey Energy has a deplorable environmental record and is doing more to pollute the land and waters of this nation than most energy companies. If you truly believe in the development of green energy and the creation of green jobs, you will resign your position on Massey's Board. Please act responsibly. - Jenifer Toth, Licking County

Quit! - Charles R & Denise J Gray, Defiance County

Shame, shame on you! You are a horrible example for our young people. - Claudine And Henry Eckhart, Franklin County

Dear President Gee, I plead for you to resign your position with Massey Energy! If you truly care about your reputation and that of our great OSU, you will do this. Our city and country needs and President Obama is making efforts to discontinue the works of this type of industry that will not allow us to become independent from foreign oil and other energy sources. I know you care about us, so please answer my(our) plea! M. Donaldson - Mary Donaldson, Franklin County

If you believe in research in alternative sources of energy and want the world to take you seriously, then you would need to resign from the board of Massey Energy. As President of a publicly funded University you need to answer to the taxpayers of the state. I urge you to do the right thing and resign - Edwina Simmons, Cuyahoga County

Gordon get off your ass and resign and stop raping the Country. You rich fools are alike, you and the rest are all crooks all you know is how to screw the system only for your game! - Jerry Townsley, Brown County

Mr. Gee- If this information that you are indeed on Massey Energy's board is correct, I find it incredibly troubling and irresponsible. You have a unique position of power with which you may do good or choose to do otherwise. Dis-associating yourself from an energy conglomerate bent on destruction of the environment and dependence on fossil fuels is mis-guided at best. Please re-think your position and use your office to take a stand. - Karen Frye, Franklin County

PLEASE DO NOT BE A HYPOCRITE - Jenine Daniels, Pickaway County

Please sever your ties with Massey Energy. We need public figures to lead Ohio to a cleaner environment. You can set a good example for citizens of Ohio. - Rebecca Khan, Montgomery County

You and your company made a mess.

Your should resign, and take no severance. Just get out. - Grover Syck, Butler County

Do not be two faced! There is no such thing as clean coal.

Mountain top mining is very bad for the environment. All your effort on fuel technology should be on solar, wind wave etc. OSU is a great research institution and should work with President Obama to develop renewable energy sources. University administrators should be barred from getting huge payments on boards of directors. Do you need the money for a yacht? - Albert Gabel

Dr. Gee,

You get paid quite enough by The Ohio State University. You need to concentrate on OSU. You DO NOT need to serve on ANY for profit boards of directors. Stop with this Wall Street mentality of making all of the money you possibly can.

Resign now!! - David Morris, Licking County

Do the right thing! - Steve Turner, Erie County

For shame! You add another chapter of infamy to corrupt public servants. - George Sapin, Cuyahoga County

You need to resign from the Board of Massey Energy. This is a huge conflict of interest - Barbara Colucci, Middlesex County

Come on Gordon, THERE IS NO SUCH ANIMAL AS CLEAN COAL! We all know it, I am sure that you do as well. Please come CLEAN, really clean. Ditch Massey.

Thanks, Peter St. John, Hamilton County

While it is hard to believe that you were unaware of the abuses of Massey Energy, I am choosing to believe this to be so. Please resign. - Carolyn Waleko, Franklin County

Please resign from Massey. This is hypocrisy! Thank you. - Ricky Crano, Franklin County

Amen! - Lisa Dahill, Franklin County

Dear Mr. Gee,
Please resign from Massey Energy. Think about your legacy.
Thank you,
Kat Gibbons, Wayne County

You can't serve two masters, especially when they hate each other. - Bill Katakis, Wood County

You "promote" clean energy but build and spend on coal and oil. Drill baby drill RIGHT!!! - Chuck Loofborrough, Lucas County

High profile educators in any position should never be linked to businesses or organisations which attempt to influence public policy. This kind of connection is even worse when it involves a company which damages everything it touches. - Georgia Gardner, Franklin County

As a 3-time OSU alum, I urge you to resign from this board. You may think you can influence them towards a "greener" policy, but this is not realistic. - Sharon Hamersley, Franklin County

Your focus should be on educating young people and consequently enhancing our nation, not adding even more money to your already over-stuffed wallet! Do the right thing and resign from this company's board! - Kimberly Harmon, Highland County

Do you serve the public or Massey? - Leonore` Johnson, Lucas County

President Gee,
Having 2 degrees from OSU and being a lifetime resident of Central Ohio and being a co-founder of local grassroots sustainability organization, I find your association with Massey Energy to be inconsistent with the positive attributes I expect of the President of OSU.
Please set a "renewable energy" example by severing your ties with Massey.
Fred Yaeger, BS Math '68, MS Computer Sci '73, Franklin County

Sir, you can't have it both ways...the ethical way is to resign from Massey and be the unbiased leader of the renewable energy/green movement.

Peace, R Kvet - Rosalind Kvet, Geauga County

Come on now. Don't we have enough corruption in this country without you adding to it. Make up your mind which side of the fence you're on and stay there. Dipping into pockets from both sides is unacceptable. - Shelley Grubb, Perry County

There is no such thing as clean coal. We want people to be safe and the environment to be livable for our children and grandchildren. Please resign from your position and do the environment a favor! - Patricia Dion, Clermont County

Be a true leader and resign from Massey Energy - Thatcher Ely

Your choice...Which master will you serve?

Go Green! - Sarah Keatts, R.N.

As an Ohio citizen and an American deeply concerned about our national and state energy policies and their environmental impact, I was horrified to learn of your ties with Massey Energy, a company with disastrous environmental and safety records. I feel further compelled to write because your relationship with Massey reflects so negatively on the other institution you represent, The Ohio State University, with which I, too, have had long and deep ties. For honor's sake, resign from your leadership position in one or the other organization. - Ann Woods, Franklin County

It's jut the appearance of an impropriety that makes you look bad. Please help out the people of Ohio and resign from the Massdy - Andy Wallis Jr, Butler County

I was very surprised to learn that you had any connection with Massey Energy. Please untangle yourself from this polluter. I am embarrassed for you! - Lindsey Kohlenburg, Morrow County

You can't be a part of the solution if you are a part of the problem - Lorraine Ramos, Hamilton County

C'mon! Get with it! Ohio State gets into enough trouble without the added insult of "double-dipping!" Do the right thing! Resign from the board of Massey Energy. - David Cuccia, Franklin County

Mr. Gee:

It is time for you to resign your position on the Board of Massey Energy!!!!

You are setting a bad example for the students of Ohio State as well as all who live in Ohio. It seems that you are being a hypocrite chairing a partnership to reduce the nation's reliance on foreign oil & develop renewable energy, while serving on the board of Massey Energy earning over \$200,000.00 annually.

Please do it now!!!

Jim O'Brien, Summit County

Something terribly wrong with this. Resign one job or the other. - Gregory Griffin

Mr Gee:

As parents of an OSU student majoring in Environmental Science, we are deeply embarrassed by your association with Massey Energy. Massey is an amoral, irresponsible corporation and its record is well documented. You should either resign from the board or resign as OSU president. - Andrew Betts, Hamilton County

The term "clean coal" is an oxymoron. Massey is an example of how badly a company can perform in areas of environmental effects and safety violations. Your service on this board and as co-chair of an effort to reduce the nation's reliance on foreign oil and develop renewable energy is a true "conflict of interest." - Rosemary Rogers, Athens County

Dear Mr Gee, being the president, of OSU and serving as co-chairman of the newly formed partnerships of public research universities, pushing to reduce the nation's reliance on foreign oil and develop renewable energy, and at the same time being paid nearly \$ 200,000.00 a year for serving on the board of Massey Energy, a coal company with one of the nation's worst environmental records, is hypocrisy, I think it's time to put your money where your mouth is and resign from the board of Massey Energy. What drives you people to do stuff like this, greed maybe. It's getting known just what you are doing, why not resign now before it gets worse. - Brenda Long, Jackson County

Resign from the board of Massey Energy or renewable energy. - Linda Carpenter, Washington County

You need to resign from the Massey Board to help us go forward into the future of energy not go backwards - Richard Braley, Clinton County

Resign! - Mary Beth Hunter, Stark County

Do not dirty the face of the earth, the renewable energy movement, or your own credibility by associating with Massey Energy. Resign from Massey's board. - Alicia Rivers, Franklin County

Mr. Gee:

Do what is moral and ethical; RESIGN from the board of Massey Energy. I have a granddaughter attending OSU and two other grandkids waiting to attend. Setting the right example is the single most important mandate given you. Do it now. - Tracy Johnson, Hamilton County

I believe there is a conflict of interest; you should resign from the board of Massey Energy. - Margaret Morris, Hamilton County

As the president of Ohio's largest university, & a supposed leader in the renewable energy & green jobs movement, isn't it more than time for you to resign from the board of Massey Energy?? - Karla Lortz, Delaware County

It beggars the imagination how anyone who calls himself an environmentalist, and advocates for renewable energy can have any relationship to Massey Energy. Massey Energy is one of the most notorious practitioners of mountain top removal coal mining, which is one of the most horrific abuses of the American landscape that has ever been seen. Then you keep company with Don Blankenship - the Darth Vader of anti-environmentalists, besides being one of the most corrupt corporate figures in contemporary America (no small accomplishment!) who boasts of buying and selling judges. A rogue who would have been right at home in the Robber Baron era. Make a choice. Either sever all your relationships with green energy groups, or sever your ties to Massey Energy. - Randy Cunningham, Cuyahoga County

A man cannot serve 2 masters - Laura Read, Hamilton County

Your position, and the money you take for it, makes a statement to all the students at Ohio State that they should value profit over people. Is that what you want to say? If so, then OSU would be better off without you. - Tracy Meisky, Franklin County

This is disgraceful and shameful. You should be setting an positive example for our young people and the rest of Ohio. Resign and donate that \$200K to efforts to preserve the environment and find truly clean renewable energy. - Linda Ramey, Montgomery County

The earth cannot stand any more death and destruction if you really care and have any honesty about yourself you will not serve the master of greed and corruption and resign from Massey. - Mary Jo Muser, Cuyahoga County

Take a deep breathe and do what you should do. As President of OSU do you need the extra \$500,000. I am sorry you are president of OSU the board should make some changes. - Deane Williams, Mahoning County

Dear Dr. Gee,

I know that Progress Ohio has called on you to resign your post on Massey Energy's Board because of serious safety problems. As a member of the Board of the Allen County Health Board I can put myself in your shoes and recognize other approaches. Your role is to hang in, study the facts and with your colleagues propose changes. I am sure you have dealt with problems every bit as serious as these and have sucessfully worked out collaborate solutions. - Tom Redding, Allen County

Can this be true? Please think of the future generations of people your position can impact . . . look inside your heart. Do the right thing. - Chrissie Carli, Hamilton County

You need to figure out where your priorities lie. You can't have it both ways and feed from the troughs of opposite ends. Guys like you sicken me...that's why America is in the dire straights that it's experiencing. Why are you just so greedy when so many of us are living hand to mouth for the moment and maybe for a long time to come? Be a man and take a stand and live or die by your word - something new??? - Teri Reinhart, Seneca County

Give it up Gee - Lance Blencowe, Knox County

Please be true to the ideals of change for our country. Big Energy will do anything to keep the status quo but we need people like you to work for a green everty future and move away from oil and coal. Do it for your grandchildren. - Barbara Wright, Dane County

Dr. Gee, I have always had the utmost respect for you and as a BUCKEYE, please to the honorable thing and resign from Massey's board. Than you sir, from a devout Buckeye. - Charles Propst, Franklin County

It's time to a responsible American and support clean energy. - James Cunningham, Franklin County

Help Ohio become green--and clean. Resign from the Massey Energy Board. - Connie Sapin, Cuyahoga County

Mr. Gee,

If you wish to set a example for your students you would your action will say more than words.

Sincerly

Gregory Vidoli - Gregory Vidoli, Cuyahoga County

We are parents of an OSU grad and a current student. We are shocked that you would be associated with a business that does these despicable things! - Michal And Norma Tynan, Franklin County

The facts are contradictory ... you need to resign from the board at Massey. You can't have it both ways as you lose your credibility. Either "you're with us or you're against us". - Cheryl Liniman, Cuyahoga County

Honorable Gordon Gee,

We wish for you to reconsider your association with Massey.

It is none of "our" business, but who is going to stick up for the little guy and the environment? - Stephen & Connie Caruso

As president of OSU, you need to set an example for the students. Being on the board of Massey is not a positive image. - Barbara Teuschler, Hamilton County

i am definitely not surprised that you, mr. gordon gee, believe that the students are too stupid to figure out the code of hypocrisy by which you live. i am definitely not surprised that you are a sell out and you would use the university to cover your scheme. i am soooo disgusted that there isn't even a word created to truly express how disgusted i am. since you obviously do not believe in ethics, you should most definitely resign your position as co-chairman. - Catherine Buchanan, Wood County

Resign From Massey Energy's Board Of Directors - Denis Macmurray, Washington County

Please take responsibility for your words and act on them. Stop taking funding to sit for something that is harming me, my family, you and your family and all our relatives that share this planet with us. I hope you listen to reason and that is where your conscience as well. - Aaron Jones, Franklin County

You hold not be involved with a coal company that is doing so much damage to our environment, when you are a head of a great University. - David Pedersen

Money is useless if we destroy our beautiful planet in the pursuit of it!! Our children deserve better!! - Melissa Lucheena Carifa, Franklin County

Where are your ethics in taking money from an environmentally irresponsible company like this? - Glenn Whiteside, El Paso County

You can't have it both ways. Practice what you preach. - Patricia Miller

Sever your ties with Massey and quit talking out of both sides of your mouth! - G Paul Gregory, Franklin County

Even the appearance of a conflict of interest should certainly be avoided. - Edward Chamberlain, Franklin County

We in Springfield are big Ohio State fans & supporters. We certainly would like for you to support us with regard to the environment. I don't understand why you stay on the Board of Massey - do you have any concerns at all for our earth? I am a middle aged Realtor who would like for our grandchildren to be able to breathe in the future! - Debbie Cushman, Clark County

Massey Energy is one of the nations worst energy companies. I ask you to resign from their Board of Directors in protest of their horrible environmental record. - Suzanne Levels, Franklin County

Please resign from one or the other, for the sake of the University community. (OSU grad '58,'61) - Shirley Marion, Montgomery County

Wonder if the Cols Dispatch has picked up this. - Shirley Marion, Montgomery County

Please don't give tacit approval to a company who has an environmental record like this one--take a stand--RESIGN! - Bev Little, Muskingum County

I know your an intelligent person and by serving for the board of Massey Energy, I do believe your highly aware of their environmental violations.

I am deeply disappointed in someone of you stature to affiliate and work for such awful company. I no longer have any respect for you and I hope sooner than later you'll realize that the \$200,000 you get from serving on their board will NOT better the welfare of society, it's people or you in the long run. You should be ashamed of yourself, your no better than George Bush. - Nadia Chen, Franklin County

I am deeply disappointed in someone of your stature to affiliate and work for such a shameful company. I no longer have any respect for you and I hope sooner than later you'll realize that the \$200,000 you get from serving on their board will NOT better the welfare of society, it's people or you in the long run. You should be ashamed of yourself, you're no better than George Bush. - Dae Kim, Franklin County

Dear Sir:

I believe you should give SERIOUS consideration to the request that you resign from the board of Massey Energy. In addition to being a singularly bad example to set for the many students of The Ohio State University, it seems like questionable ethics to me. How can you serve on this board while claiming to support research into new energy resources? - Elizabeth Sheets, Wayne County

Resign now. You're not doing what's best for OSU or the state of Ohio. - Robert Hajdak, Summit County

Please resolve your appearance of conflict of interest by resigning from Massey Energy. Thank you. - Peter Paladin, Cuyahoga County

Have you decency, Sir ? - Have you no decency ?

People are growing vastly tired of the likes of hypocrites like yourself.

Give up your position and give up your financial gain ! The perceived betterment of own position in life comes with a horrible price.

You should be ashamed ! - Cheryl Garn, Richland County

Your obvious lust for the \$200K salary from such a disreputable coal company is a disgrace and you dishonor Ohio State University. Shame, Shame!! - Robert Karp, Lucas County

Please do resign from Massey's board, for the sake of the reputation of The Ohio State University, if for no other reason. A quick trip to West Virginia would open your eyes to countless other very good reasons for disassociating yourself from Massey Energy. You probably see only smiling faces in the board room; in the mountains, you'd see faces whose suffering would appeal to your better nature. I feel confident you will do what's best for OSU and the nation, i.e., resign.

Thank you.

Dr. Kezia Sproat, OSU MA 1963, PhD 1975 - Kezia Sproat, Ross County

How pathetic that a man of so little character and principle can speak for a University. Let Gee collect his \$200,000 from a predatory coal company and resign from his OSU position...I don't want my tax money going to him. - Dolores Forge, Franklin County

Just another example of People who sell themselves. Doesn't any one of our leaders have any SELF RESPECT, and a Set of Principles that promotes their community, and our children's future, or are they all just for SALE? Enjoy your money Gordon, maybe there will an Armored car following your hearse. - Dawn Stanko, Franklin County

Please be part of the solution not a main part of the problem. - Betty Allard

Mr. Gee,

After reading your record on your failed policies I also feel that you should resign from the Board of Massey Energy. Joan Martin, Hamilton County

Dr Gee,

I was pleased to learn that you were serving as co-chairman of a newly formed partnership of public research universities pushing to reduce the nation's reliance on foreign oil and develop renewable energy. But, in turn, I learned that you were serving on the board of directors for Massey Energy. Certainly, you must be aware of how conflicting that arrangement is! Don't you think that you could give advice to Massey without being identified with their terrible record on the environment? Thank you for listening. - Dennis Ring, Franklin County

As a university President, we expect you to hold a high ethical standard. But you are failing us. You should be ashamed of yourself. Not only is Massey Energy's environmental record horrible, they are a completely morally bankrupt corporation from the top down. Please do the right thing and resign the board of Massey Energy immediately. - James Decker

It's time you resign from a polluter and despoiler of natural habitat, Massey Energy.

And in this time of a strained financial budget in the State of Ohio, I call on you to take a major pay cut as the President of OSU, and to return every penny of your salary and compenstion package except for \$1! - Marlene Bomer, Wood County

It is regrettable that you have chosen to engage with one of the nation's most destructive environmental foes. It is embarassing that you have been named as a leader for the renewable energy and green jobs movement. It is hypocritical that you have chosen to juxtapose these two positions and will receive monetary benefit from both.

Please sever your ties with Massey Energy as soon as possible. Do not disgrace our state further. - Valorie Mendelson, Lake County

It is time to stop being a person who never really gives a straight answer. - Thomas & Suzanne Devers, Montgomery County

Just one more reason why I can't stand Ohio State! Not everyone in Columbus is enamored of it or of you, and FOR SHAME on you for being such a hypocrite - Sara Trepanier, Franklin County

Shameful. How much money is enough? - Alvin Aliff, Licking County

You cannot have it both ways. You are either with the green movement or you are against it. Coal is against it! - Brian Bomer, Henry County

Please show us how you're helping Massey or sever your ties. - Alvin Ko, Cuyahoga County

Mr. Gee:

You should be simply disgraced by your actions and stripped from OSU and be forced to give back 10 years of your lush salary!!!.

If I had my way, the top three layers of Administrators, CEO's, Presidents and Vice Presidents of any organization in the US would be AXED. They are a non-productive group of any organization who syphon off all the dollars they can and do as little for the organization as possible. The people who actually work their tails off to make the organization get what scraps the GREED HUNGRY administrators leave.

If you're not performing for the organization you should be let go. - Pauline Chapman, Medina County

Dear President Gee,

I agree that as the public face of Ohio's flagship, land-grant university, that you should resign from Massey Energy' Board of Directors. I am a proud alumni parent and a real fan of you and your commitment to OSU. Please consider taking the correct symbolic and real step and severing ties with a coal producer. Our future is in moving away from coal. Help your university and your state take the lead in taking this difficult step. - Michael Duff, Summit County

How can anyone who believes in green energy accept \$200,000.00 from a company that has such a shameful environmental record? - Margaret Wright, Franklin County

Shame on you. The young people you shepherd deserve a better roll model. Speaking out to save our planet shouldn't be just a ploy to obtain funds. I am dumb-founded at the lack of morals and conscience so many are demonstrating these days! Seems you had plenty of company under that rock. - Jayleen Hatmaker

All the "aw shucks" grins and bow tie silliness cannot cover up a despicable conflict of interest. Is it that you have no moral compass or are you just greedy? - Aloysius Wald, Franklin County

You should be ashamed of yourself.How can you be on both sides of the fence.Because it's greed get all you can from both sides, your wallet gets fatter. - Glen Dunaway, Cuyahoga County

I continue to be frustrated about the inequities in our society, and now I learn about the one you are benefitting from. I really feel that people, like you, who are drinking from the public drinking fountain, should be made to be beholden to me, and no one else. If you have time to be a director of a coal co. than some one else is doing the work my taxes are paying you to do. Please, please, give up your position as a director of the Massey Corp.
- Dan Kanoza, Hamilton County

I am very interested in knowing what you have done as a board member, to resist the destruction of our mountains? - Ellie Inglesi, Franklin County

As an alumni and avid Ohio State University supporter, I am appalled to find that you are on the board of Massey Energy. I have been enthusiastically reading of OSU's attempts to become more environmentally friendly, and then I read of this. I would strongly encourage you to set the higher example and resign from this board. - Eliza Souders, Franklin County

It has been brought to my attention that you are in a conflict of interest situation. How can you, in good faith, be co-chairing a committee to reduce our reliance on foreign oil and develop renewable energy at the same time you're on the payroll of Massey Energy, a major polluter in the coal industry. I recommend that you choose your priorities and remove yourself from one or the other. I hope that you will choose to be forward thinking and get off the board of Massey Energy. This would be better for the earth and for the futures of the students who pass through the Ohio State University on their way to responsible adulthood. - Debbie Perlmutter, Lucas County

You should resign from OSU! - Tom Fox, Stark County

President Gee please resign from this terrible board. - Mark Burkholder, Franklin County

As a graduate of OSU, I was greatly disappointed to find out that you are sitting on the board Massey Energy. I was glad you came back to the university, I felt you did a great many things for us; like co-chairing the newly formed partnership of public research universities pushing to reduce the nation's reliance on foreign oil and develop renewable energy. That is forward thinking and good for our world. Your relationship with Massey calls into question your motives and judgement. How can you sit with Massey and then say you are working for the environment and our future. These two entities are not consistent with one another.

Please resign from Massey and show the leadership that we have learned to expect from you!

Respectfully yours,

Lou Bernard

M.A. in Education, 2003 from The Ohio State University, Franklin County

Your intentions and your actions must be in accord (the same), to do and act otherwise is devious and not what we must expect from you. Please don't be deceitful, resign from the board of Massey Energy. - Genevieve Turner, Franklin County

Your connection with Massey Energy is a blatant conflict of interest. Resign your Board position or your university

research role into development of renewable energy and end of reliance on foreign oil. - Linda Einfalt, Hamilton County

please resign from massey energy. - Brian Leist, Franklin County

What kind of message are you sending to our young people? To be consistent, you must resign from the board of Massey Energy. - Barbara Williams, Franklin County

You pocket \$200,000 a year to sit on the Massey Energy Board while president of OSU is outrageous while co-chair of the newly formed partnership of research universities. How discrepant! Resign you money grabbing scoundrel. - William Krosky, Lucas County

Coal is not a renewable energy resource, aside from being one of the dirtiest and environmentally destructive fuels. Mr. Gee, if you are going to present yourself as a champion of renewable energy and green jobs in Ohio, and expect anyone to take you seriously, it is imperative that you give up your cushy position on the board of Massey Energy and your \$200,000/year reimbursement for it. We've had too many political instances of the fox being appointed to watch the henhouse here in Ohio, and if you want to maintain any credibility, it's high time you step away from this particular henhouse. - Diane Pekarck, Geauga County

You can't be an educator and also be in the pocket of one of the worse polluters of our environment in the Country. - Jerry Gobble

Dear Mr. Gee,

Your 'dirty coal history' through continuing to sit on the board of Massey Energy coal company while representing OH at our #1 university and functioning as the appointed leader of our sustainable energy job initiatives are incompatible and hypocritical stances, to say the least. Resign from Massey or from Ohio State and end this duplicity now!

Sincerely, Cathy Crumley, Lucas County

President Gee,

As an OSU alum (2 degrees from OSU), and founder of a Central Ohio grassroots sustainability group, I know that OSU is committed to improving its sustainability profile. One big way is to use less coal and to not remove mountaintops.

If you really support OSU's public efforts to improve sustainability, I would hope you'd use your position on the Massey Board to push them to become a more sustainable company by not removing mountaintops which is extremely harmful to the local environment, and to diversify to develop other renewable energy generation methods.

To show you support your university's position of increasing sustainable power generation and use, I suggest you forgo the money that Massey gives you until they stop mountaintop removal. Stay on their board, gratis, as a voice for improvement, showing you do not approve of Massey's current performance by not taking money from them. Or, if you prefer, donate all of the money they pay you to renewable energy causes.

Respectfully,

Fred Yaeger Jr

(BS Math '68, MS CIS '73) Franklin County

Gordon Gee, Please Resign From Massey Energy's Board Of Directors People should not belong to anything that they do not believe in 100%. - Sherri Hickman, Butler County

Mr. Gee, while I am currently living in Florida, I will always consider Ohio my home. I was very proud to hear of your participation in a partnership for renewable energy research. HOWEVER, I sincerely hope you will resign from the board of Massey Energy now, as continuing to collect money from a company with such a horrific environmental record is the ultimate hypocrisy. - Hillary Keyes, Palm Beach County

Resign from Massey - Dave Gustafson, Athens County

Dear Mr. Gee,

Given the importance of maintaining integrity, how is it possible to be on the Board of Massey Energy and a newly named leader in the renewable energy and green jobs movement at the same time?

Thanks in advance for responsible action in this matter.

Regards,

Jackie Millay, Hamilton County

Resign Now!!!! - Trina Ohliger, Stark County

As a former resident of West Virginia, I implore you to sever your relationship with this company. There is absolutely no excuse for the lack of mine safety in an industry which is one of the most dangerous. There is no excuse for blatant environmental pollution of this magnitude. - Joann Rusk, Franklin County

Please sever your ties with Massey and work toward clean energy. - Judith Filaseta, Franklin County

It is completely incongruous for you to continue serving Massey Energy and the people of Ohio at the same time. Resign from their board! - Edwin Bixenstine, Portage County

Mr. Gee,

Coal is not a renewable energy source. Stop prostituting yourself to coal. Stop being a hypocrite - either resign from the coal board or the committee.

Sincerely,

Kathy Rosner, Cuyahoga County

Please help Ohio by getting behind industries that are good for the state. Your visibly stepping down from this Board would send a strong and valuable message. Thanks, -John - John Deever

Mr. Gee,

Your serving on the Board of Massey Energy speaks volumes, and is teaching every student at every level; you are leading by example. The problem is, it is the wrong example! - Kristin Peterson, Lorain County

Dear Dr. Gee:

You are the most powerful, most esteemed, and most politically connected administrator in our state. Please have NOTHING to do with Massey Energy, which sets a HORRIBLE example for businesses striving to become practitioners of clean, green energy.

Thank you.

Sincerely,

Mitsi Wagner

Cuyahoga County

Dear Dr Gee,

We need your head and your heart in the right place. Please support clean energy, and dump the polluters. - Karen Fries

This is a huge conflict of interest. During this difficult economic time, return the taxpayers faith in the system. We are disappointed all too often by stories of people in positions of authority abusing their power. Please resign from the Board of Massey Energy now. - Margaret Wienholts, Hamilton County

As an OSU alumni and a President's Club member, I was embarassed to learn that you are on the board of this corporation. Please resign now! - Carolyn Pettit, Scioto County

Dear President Gee:

I'm afraid Brian Rothenburg and Progress Ohio are right. Your position on Massey's Board of Directors seems like a black eye for Ohio State University. I am an alumni of the Ohio State University Moritz College of Law practicing law in Appalachia. Massey has the most horrific environmental record of any of the major coal companies working the Eastern U.S. coal fields. I understand that you may be encouraging Massey to come clean and that having someone on the inside urging that role is important for positive change to happen. However, it shouldn't be you, at least while you are also the face and President of the Ohio State University. Please consider parting ways with Massey on behalf of the Ohio State University and the many good works it pursues for the common good. Thank you for considering my views on this important matter. - Jonathan Sowash, Athens County

As an educator it is your duty to show your students that hypocrisy is wrong. You cannot continue to tout green energy while sitting on the board of Massey. - Ronald Wharton, Franklin County

Gordon

Please Resign from Massey and stay with a group that will protect our environment. I know OSU is doing research to save the environment. and As president you should support that movement. As a OSU retiree I urge you to show leadership in protecting our environment. You sure don't need the money. - Gene Leonard, Seminole County

Are you kidding me? This is a no-brainer, Mr. Gee. And we know you have a brain. The question is, do you have a heart?

Quit the Massey Board. - Craig Bickle, Franklin County

It is an abomination to think that you are serving on the board of this business. This man runs his company with an iron fist as a dictator-- and with the same lack of compassion or empathy for the environment or his employees. He has proven that time after time. Put your money where your mouth is and do the honorable thing-- withdraw from the board and use your position to make change in a different way. If you truly believe that by sitting on the board you can make an impact, then stay- AND GIVE UP YOUR \$200K salary as an example to those of us who see your seat more as tantalizing way to get more money in your pocket than as a means to effectuate change. Your position on the board and the salary you receive from it are perfect examples of the problems we have in this country and which have brought us to our knees financially. The greed, contempt and sheer expectation of entitlement to these positions and money are disgusting. - Penny Loucas, Summit County

Please quit trying to serve both masters--they are total opposites!

If you can't give up that income, convince Massey to stop mountaintop removal. - Fwen Crockford, Montgomery County

Definite conflict of interest. I don't want my tax dollars spent on unethical behavior. - Edward Halloran, Hamilton County

Please reject hypocrisy. Be consistent in word and deed. To be involved in the effort to reduce our dependence on foreign oil does not suggest that promoting the use of dirty and destructive coal as a viable substitute! - Thomas Brownfield, Pickaway County

OSU pays you PLENTY give up your profitable board spot at dirty Massey - you are part of the problem. IF you can't make Massey right get OUT! - Va Bicknell, Franklin County

I've known about Massey Energy's abuses for years. I am stunned to discover that Gee is a member of their board. - Barbara Beaver, Hamilton County

Why are you retaining your board seat with Massey? Your salary is public record. Surely the money can mean little to you. Are you serious about finding green alternatives to our dependence upon fossil fuels? -- or is this just a gesture to support a politically forward and correct image at this time? - Mark Brown, Franklin County

Massey's backyard needs to be cleaned up and if you do not resign from his board, you are right in the middle of the dirty backyard. Do the right thing and shake him loose. - Cheryl West, Cuyahoga County

As an OSU alum I urge you to quit the board of Massey immediately! - Rick Strater, Union County

Since you are a newly named leader in the renewable energy movement, it's time to sever your ties to that polluting Coal company, Massey Energy. Please do the right thing and resign from Massey Energy's board. - Julia Radwany, Summit County

Dear Dr. Gee, As a loyal OSU Alumni since 1961, I think it is shameful that you are part of this company's Board of Directors given their incredible record of environmental degradation. I think you should publicly resign and state why you are resigning. Do the right thing Dr. Gee! - Richard Meyers, Lucas County

Please use integrity in your decision making. Be a pioneer and leader in our efforts to protect our planet! - Rebecca Doss, Franklin County

Dear Dr. Gee:

I do not think it proper to take money from a coal company and represent an environmental issue at the same time.

Ken Johnsen - Kenneth Johnsen, Franklin County

What the hell are you thinking! - William Ebben Mse, Jd, Butler County

Soon, hopefully the president will see how worthless and corrupt our state university presidents are and will begin removing overpaid administration - David Schuckert, Summit County

Please use your very public leadership position for the good of our community, state and country. Set a positive example for the future by resigning from Massey. - Judi Moseley, Franklin County

As a leader in the environmental movement you have an obligation to distance yourself from an industry that is intent on slowing the growth of progress on clean renewable energy. - Greg Method, Cuyahoga County

OSU Grad "64" and "72" - Donald Hyatt, Franklin County

Also, you and the board of directors need to give up a portion of your salary to preserve Ohio's heritage. - Tonia Hazelwood, Franklin County

Greed knows no boundaries ! I guess it isn't enough to be overpaid at one job, you have to have your fingers in another "cookie jar" besides. You are an example of what has ruined this country ! - Jerry Davis, Holmes County

It's time for change. It is time to resign, your actions are not supportive nor ethical. - Tequila Pickens, Marion County

Have some integrity. - Lou Peters, Franklin County

If you are serious about reducing our dependence on oil then it's time for you to resign from the board of Massey Energy. Do the right thing and help make us a "green nation." - Ted And Sue Behr, Montgomery County

Gee should be prosecuted by the state of Ohio. Resign from Ohio State, resign from Massey, then Go to jail. - Bill Katakis, Wood County

Does your presidency pay so little that you have to sell your soul. - Carolyn Alpert, Cuyahoga County

Time to go. - Jim Jordan, Trumbull County

Do the right thing. Resign from Massey's Energy Board of Directors. - Deborah Darr, Stark County

Mr. Gee:

While the newly formed partnership of public research universities to help facilitate the move to a green economy is an excellent idea and your role in it to be commended, the Massey connection calls into question the integrity of the endeavor. We do so need to engage the best minds of the academic as well as the scientific communities in the serious business of the day. I don't believe you can honestly do justice to the pressing environmental needs of today which are so much a part of the overall financial crisis, along with education and health care, and have special interest in and also serve and be indebted to such an environmental polluter as Massey Energy. Sincerely, Sondra Schultz - Sondra Schultz, Cuyahoga County

Gordon - how can you serve on the board of this organization? How could anybody serve on this board. This organization should be sanctioned and you should sever all ties with it. - Gretchen McClincy, Franklin County

Dr. Gee,

You being a person a person that represents Ohio State University should be ashamed of being on a board that represents a company as greedy and which has so little regard for environment a Massey. You should be aware that Massey has only one thing on their mind and that is money, They will stop at nothing to achieve their goal. If it's money that makes you click then I and the OSU nation are all very disappointed in you. - David Dilly, Coshocton County

Can anyone exercise common sense these days! Do the right thing and think about the future of our children!!!!!!

It's not rocket science for God's sake! Wake up! - Judy Brownlow, Franklin County

RESIGN NOW. - Betsy Wilson, Franklin County

If you cannot positively use your influence to change Massey's poor environmental record, quit! - Kathleen Birch, Cuyahoga County

Please resign from Massey. My home state of WV is suffering greatly because of the mismanagement by Massey and others. Your position on their board compromises the integrity of OSU. - Carol Smith

Do the right thing Dr. Gee, resign Massey energy now. Massey is a corporate outlaw that is spewing chemicals and coal dust within 300 feet of a K-5 elementary school. Massey also has a strip mine above this school along with a 1,900 acre strip mine. - Julia Bonds, Raleigh County

Give it up bow tie. Be a real model to the country. How much money do you need to live, or is it an addiction to power? - Marge Redmond, Franklin County

You are setting an example for our future leaders. Integrity is far more important than anything else they can learn at the University. Please consider ALL of your behavior-you are a very high profile figure. MAKE the sacrifice. YOU HAVE ENOUGH MONEY!!! - Amy Ivanoff, Franklin County

Are you working on solutions to the problems this company is having, if not please do the right thing. - Rosalind Swayne, Franklin County

I always thought you were bad for OSU and now I know you are bad for Ohio. What a creep. - Sharon Libert

Are you on this committee to reduce dependence on foreign oil because it could benefit Massey Energy, upon whose Board of Directors you sit? If you are on this committee because you think the US should be less dependent on foreign oil, resign from Massey's board. If you are on this committee to benefit Massey, resign from the committee. - Dawn Grattino, Lake County

Read our lips... R-E-S-I-G-N. - Joan Rosenbusch, Lorain County

Dear Dr. Gee,

I think there is a conflict of interest when you are president of OSU -- which receives so many federal & state research dollars -- and the board of a private energy company. I would think you'd agree; I hope you will resign from the Massey board.

Sincerely,

Karen Rothman, Wood County

As an alumni of OSU, I'm asking you to resign from Massey. It's shameful to sit on the board of a business that has such an ugly environmental and worker's rights record. - Lee Evans, Franklin County

As a lifelong resident of Columbus, Ohio and a Capital University student living on Ohio State's campus I realize what an impact OSU has on the surrounding area. Your presidency reflects not only upon the Ohio State University but also upon the entire central Ohio community. While being on the payroll of Massey or associated with them at all you cannot truly fulfill your duty to end the toleration of anthropogenic degradation of our planet - Jackson Proctor, Franklin County

Sorry but your personal income arrangement and your public policy don't match. Time to put integrity first and resign as a public statement. - Mary Igoe Meyers, Lucas County

How can a public servant who claims to be an educator, take money from a company (Massey) which is anything but green? Obviously, we picked the wrong man for the job. - Suzana Megles, Cuyahoga County

Your leadership role requires your actions to send a clear message about the importance of corporate responsibility.

Thanks for considering the significance of the energy issue. - Marcia Levine, Cuyahoga County
