

Dear Mr. Cee

I am a previous resident of West Virginia. I resided in both Raleigh and Harlow County. Born and raised in Fayette.

I understand that one of this States resources is Coal mining. In fact I have a twenty year old son that does surface mining.

Coal has the highest percentage to create Energy.

I left my home town, Family and Friends Two years ago; and moved to Northern Kentucky.

Due to Mountaintop removal, I lost my home and an auto mobile in a Flood. Mountaintop removal Coal mining must stop. I'm sure I'm not the only person that lost their home not will I be the last.

You have championed green energy initiatives and revitalizing our communities with green-collar jobs. you can demonstrate your commitment by resigning from Massip's Board.

I welcome your leadership in promoting

New energy sources. Once you severed  
your ties to Massey Energy, you will  
have the Credibility needed to lead.

Please write me back and tell me when  
you plan to resign from Massey's  
board.

Best wishes to you and your family.

Sincerely,  
Keith Highfield  
1530 Fieldview Circle  
Florence, Ky 41042

I've enclosed a few photos of the "2007"  
Flood, this is Boone County WV  
enveloping Ashford, Bumble, Costa,  
Nellis and Ridgeview.

As both of us are certain, Massey has  
many mining organizations there.
