November 10, 2008

Mr. Marc Gerken, President  
AMP-Ohio  
2600 Airport Drive  
Columbus, OH 43219-2242

Dear Mr. Gerken,

According to press reports, AMP-Ohio has recently received a revised feasibility study for the proposed AMP Generating Station. The reports say that the construction cost has risen over \$400 million since the estimates of January 2008, with additional increases in the costs of financing.

AMP-Ohio has not provided the study to the public nor even posted the press release on its website. As you know, thousands of electric ratepayers across several states have a keen interest in how the proposed building of the AMPGS could affect their electric rates for fifty years. I urge you to make the revised feasibility study public, as you did with the January 2008 study.

Over the past year, it has been clear that Ohio Citizen Action and AMP-Ohio have differing points of view on the proposed coal plant. However, we also have many interests in common, including an interest in energy alternatives, energy efficiency, and the future of AMP-Ohio's communities. In order to improve our communications and avoid misunderstandings in the future, I would like to invite you to meet at your convenience.

Sincerely,

Sandy Buchanan  
Executive Director
