Monitor Values Report

Geographic Area: Monroe Co, MI

Pollutant: Particulate (size < 2.5 micrometers)

Year: 1998, 1999, 2000, 2001, 2002, 2003

EPA Air Quality Standards:

Particulate (diameter < 2.5 micrometers): 65 µg/m³ (24-hour average), 15.0 µg/m³ (annual mean)

µg/m³ = micrograms per cubic meter

5 Rows

[About exporting](#)

Disclaimer: AirData reports are produced from a monthly extract of EPA's air pollution database, AQS. Data for this report were extracted on May 04, 2004. They represent the best information available to EPA from state agencies on that date. However, some values may be absent due to incomplete reporting, and some values subsequently may be changed due to quality assurance activities. The AQS database is updated daily by state and local organizations who own and submit the data. Please contact the pertinent [state agency](#) to report errors.

Readers are cautioned not to infer a qualitative ranking order of geographic areas based on AirData reports. Air pollution levels measured in the vicinity of a particular monitoring site may not be representative of the prevailing air quality of a county or urban area. Pollutants emitted from a particular source may have little impact on the immediate geographic area,

and the amount of pollutants emitted does not indicate whether the source is complying with applicable regulations.
